

MOBIVISOR MESSENGER

Messenger is an application for your mobile devices for secure, intra-company communication via chat.

INSTALLATION*

- Required: You are registered as an admin in your MobiVisor MDM portal.
- Via the user groups you can distribute the messenger app on the mobile devices of your company
- The user must now be registered in the app with QR code or directly via MobiVisor (should MDM be installed)
- After successful registration all users, chats and chat groups can be managed via MDM

FEATURES

- Encrypted sending of images, videos, voice and text messages, locations and files among users
- Sending push messages from the MDM portal
- View recent online status
- View whether messages have been delivered and read
- Distribute access rights to users
- Assign users to closed groups
- Admin mode for groups so that only selected users have write permissions
- Filter & Bulk Operations to reduce administrative overhead
- Archiving of chats and files

INFORMATION

Hosting:

- On your company server (on-premise), in our German cloud or a private cloud.
- MobiVisor and all extensions are hosted exclusively in Germany and therefore DSGVO compliant
- Interfaces/ APIs developed within MobiVisor
- The traffic is completely without phone number or phone book data
- complies with the following directives and laws: EU-DSGVO, BDSG, TKG, TMG**.
- All connections are established in MobiVisor messenger via TLS

*MobiVisor Messenger can also be used as a standalone application, without using MDM. For more information feel free to contact us!

** You can find more information about the processing of personal data in our privacy policy

MobiVisor Messenger is a product of IOTIQ GmbH. All images and texts are products of IOTIQ GmbH and may not be used without express permission.
