How to add an app via Apple VPP

In this guide, we'll show you where and how to add an app to your MDM environment via Apple VPP.

What's Apple VPP?

- VPP stands for: Apple Volume Purchase Programme
- This enables IT administrators to purchase, distribute and manage apps and books in bulk for organisations and educational institutions.

Use in MDM:

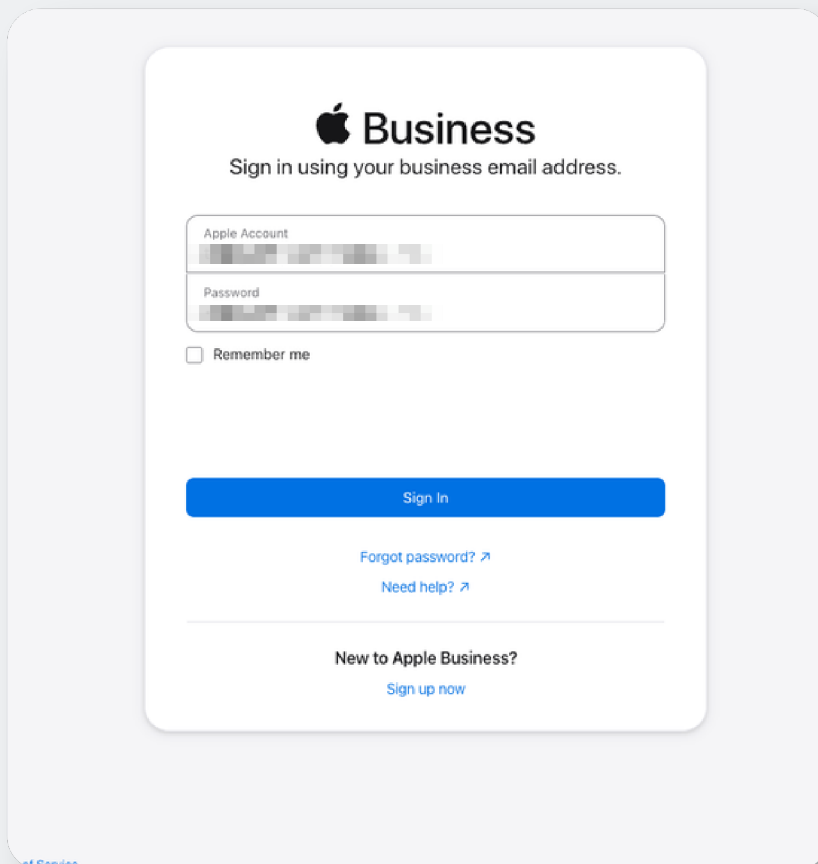

- In order to add apps to Managed Apple DEP devices and distribute them via MDM, they must first be acquired through the Apple VPP.
- If the desired apps are not available free of charge, they are also paid for via Apple Business.

To add apps via Apple VPP, you will need your login details for your MobiVisor domain and the Apple Business Portal.

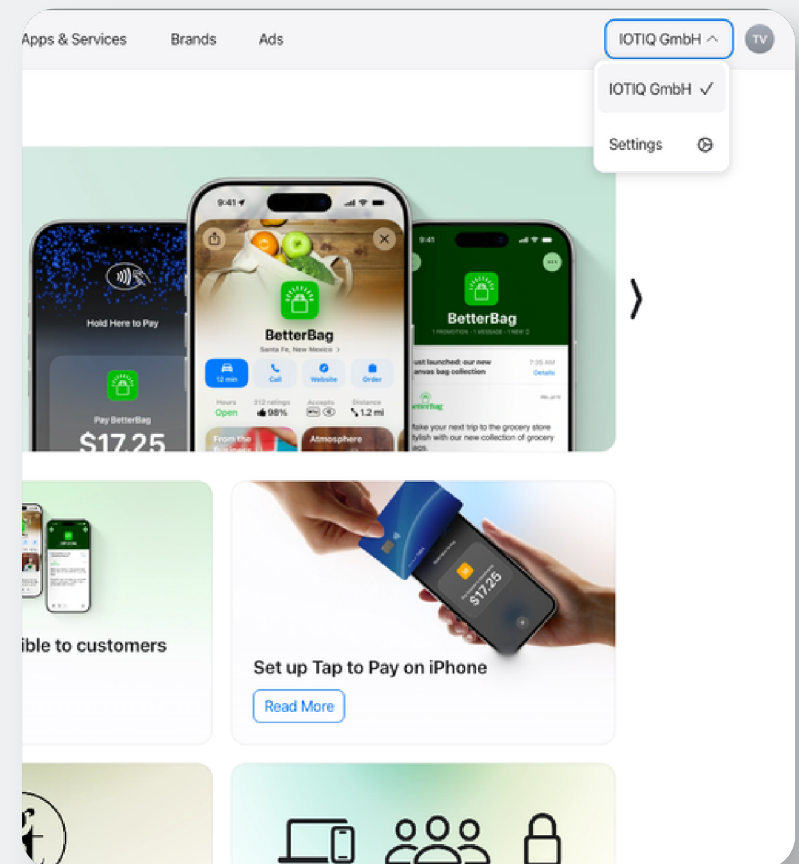

MOBIVISOR

Step 1

Log in to your **Apple Business Account** at **business.apple.com**. Click on your company name in the top right-hand corner and go to **"Settings"**.

The screenshot shows the Apple Business sign-in interface. At the top, the Apple logo is followed by the word "Business". Below this, it says "Sign in using your business email address." There are two input fields: "Apple Account" and "Password". Below the password field is a checkbox labeled "Remember me". A large blue "Sign In" button is centered below the inputs. Below the button are two links: "Forgot password?" and "Need help?". At the bottom, it says "New to Apple Business?" followed by a "Sign up now" link.

Step 2

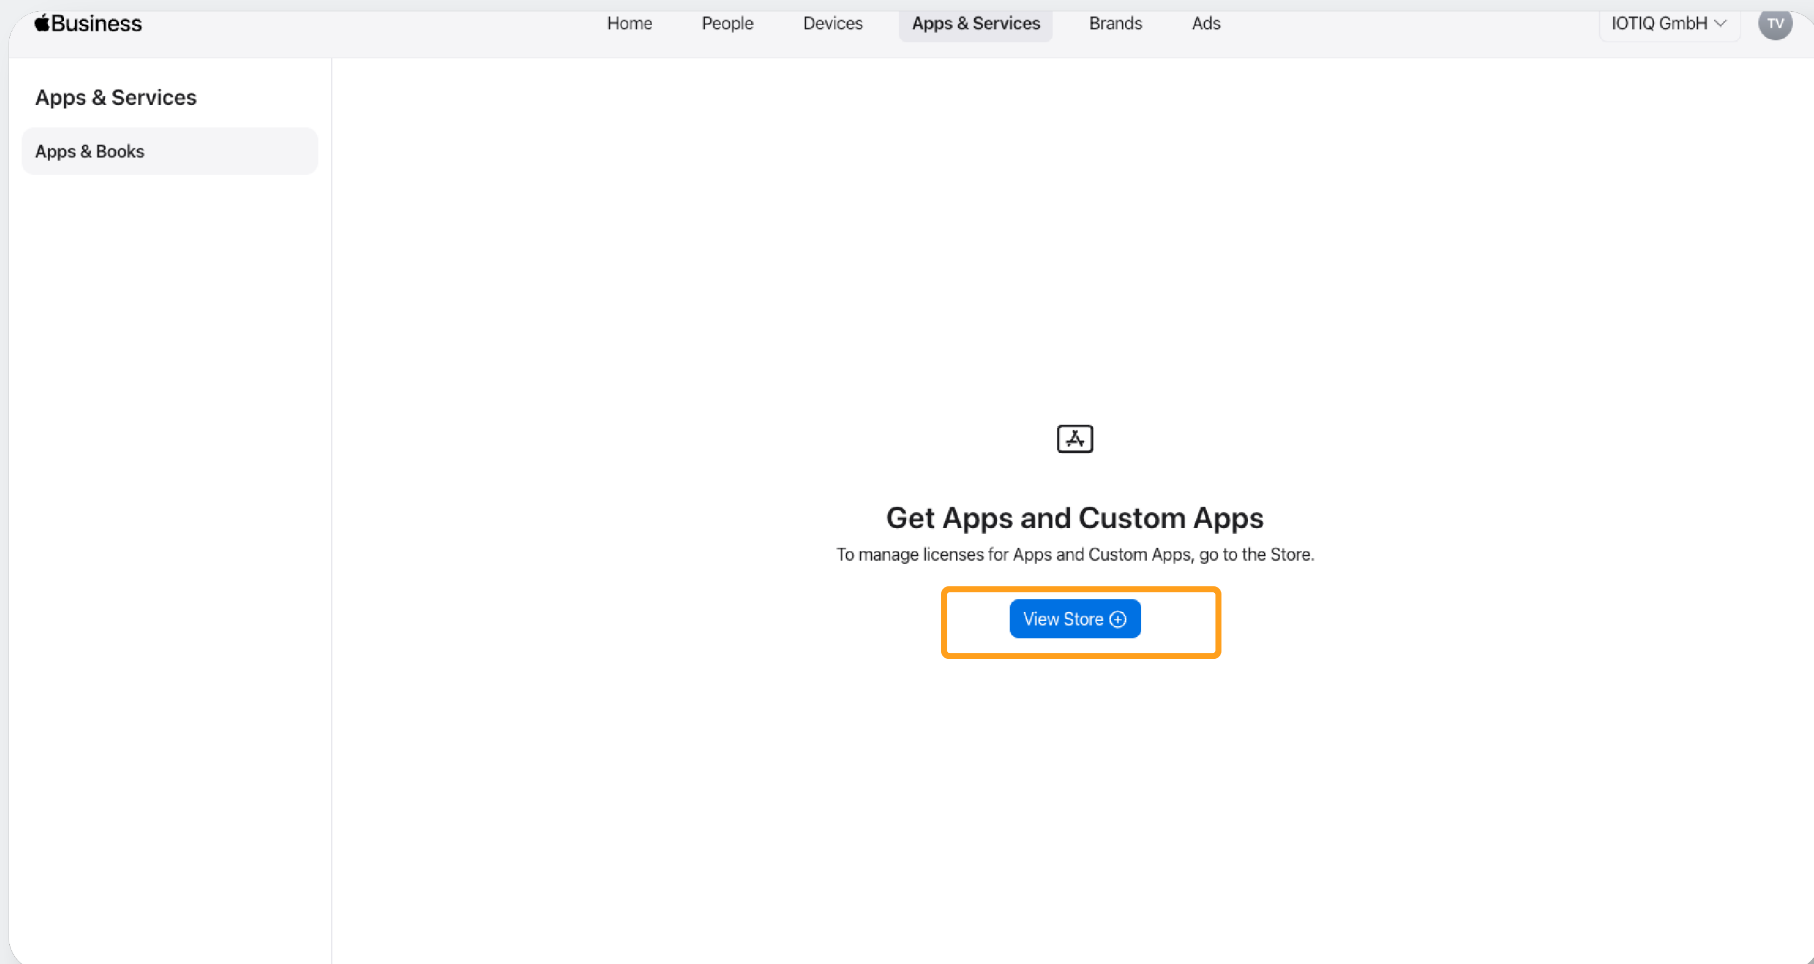

If you wish to add or change your payment details, go to **“Payments and Billing”**.

A screenshot of the Apple Business portal interface. The top navigation bar includes the "Apple Business" logo, a menu with "Home", "People", "Devices", "Apps & Services", "Brands", and "Ads", and a user profile dropdown for "IOTIQ GmbH" with a "TV" icon. The left sidebar lists various settings: "Settings", "Organization", "Payments & Billing" (highlighted with an orange border), "Domains", "Roles & Permissions", "Beta Features", "Organizational Units", "Access Management", "Sign in with Apple", "Apple Services", "Integrations", "API", "Partner Access", "Activity Center", and "Legal Terms". The main content area is titled "Payments & Billing" and has two tabs: "Apps & Books" (selected) and "Purchase History". Under "Payment Methods", there is a description and two "Add +" buttons for "Shared Payment Method" and "Payment Method". Below this is the "Store Credit" section, showing "€0.00" and an "Add +" button. The "Content Tokens" section includes a description and a "Download" button. At the bottom, there is a list of "2 Content Tokens" with an entry for "IOTIQ GmbH" and a "Download" button.

Step 3

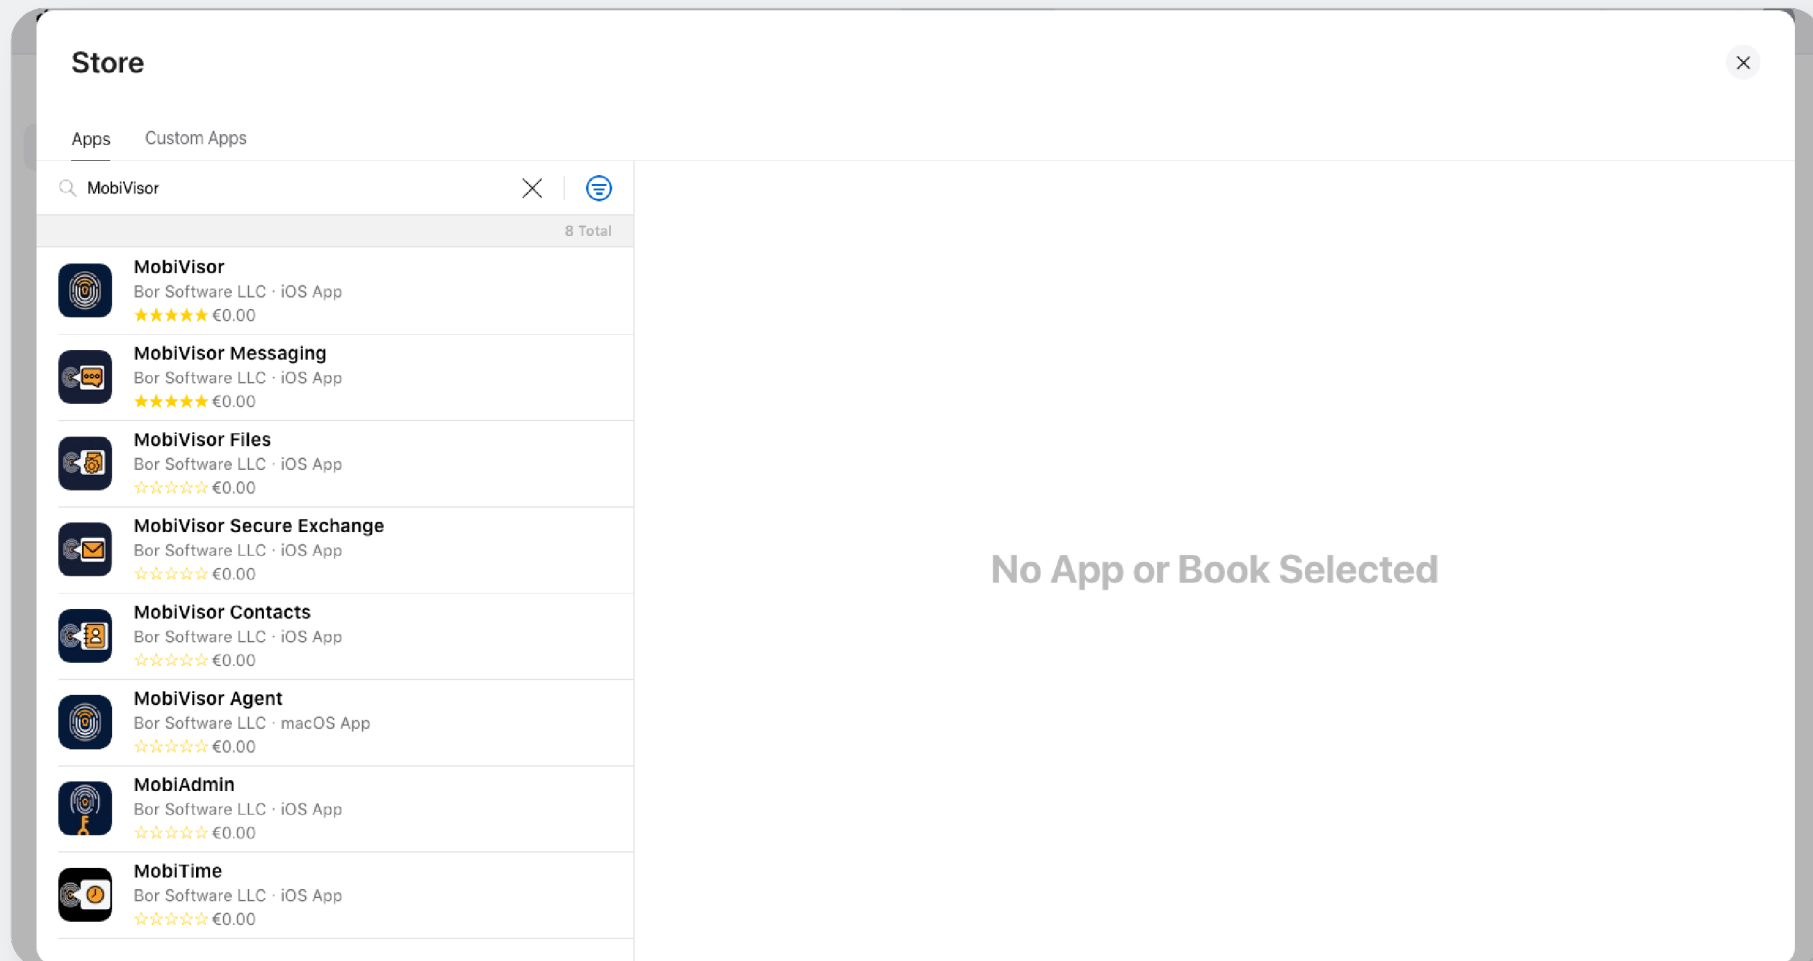

To select apps to add, go to **"Apps & Services"**. To view the App Store, click on **"View Store"**.

MOBIVISOR

Step 4

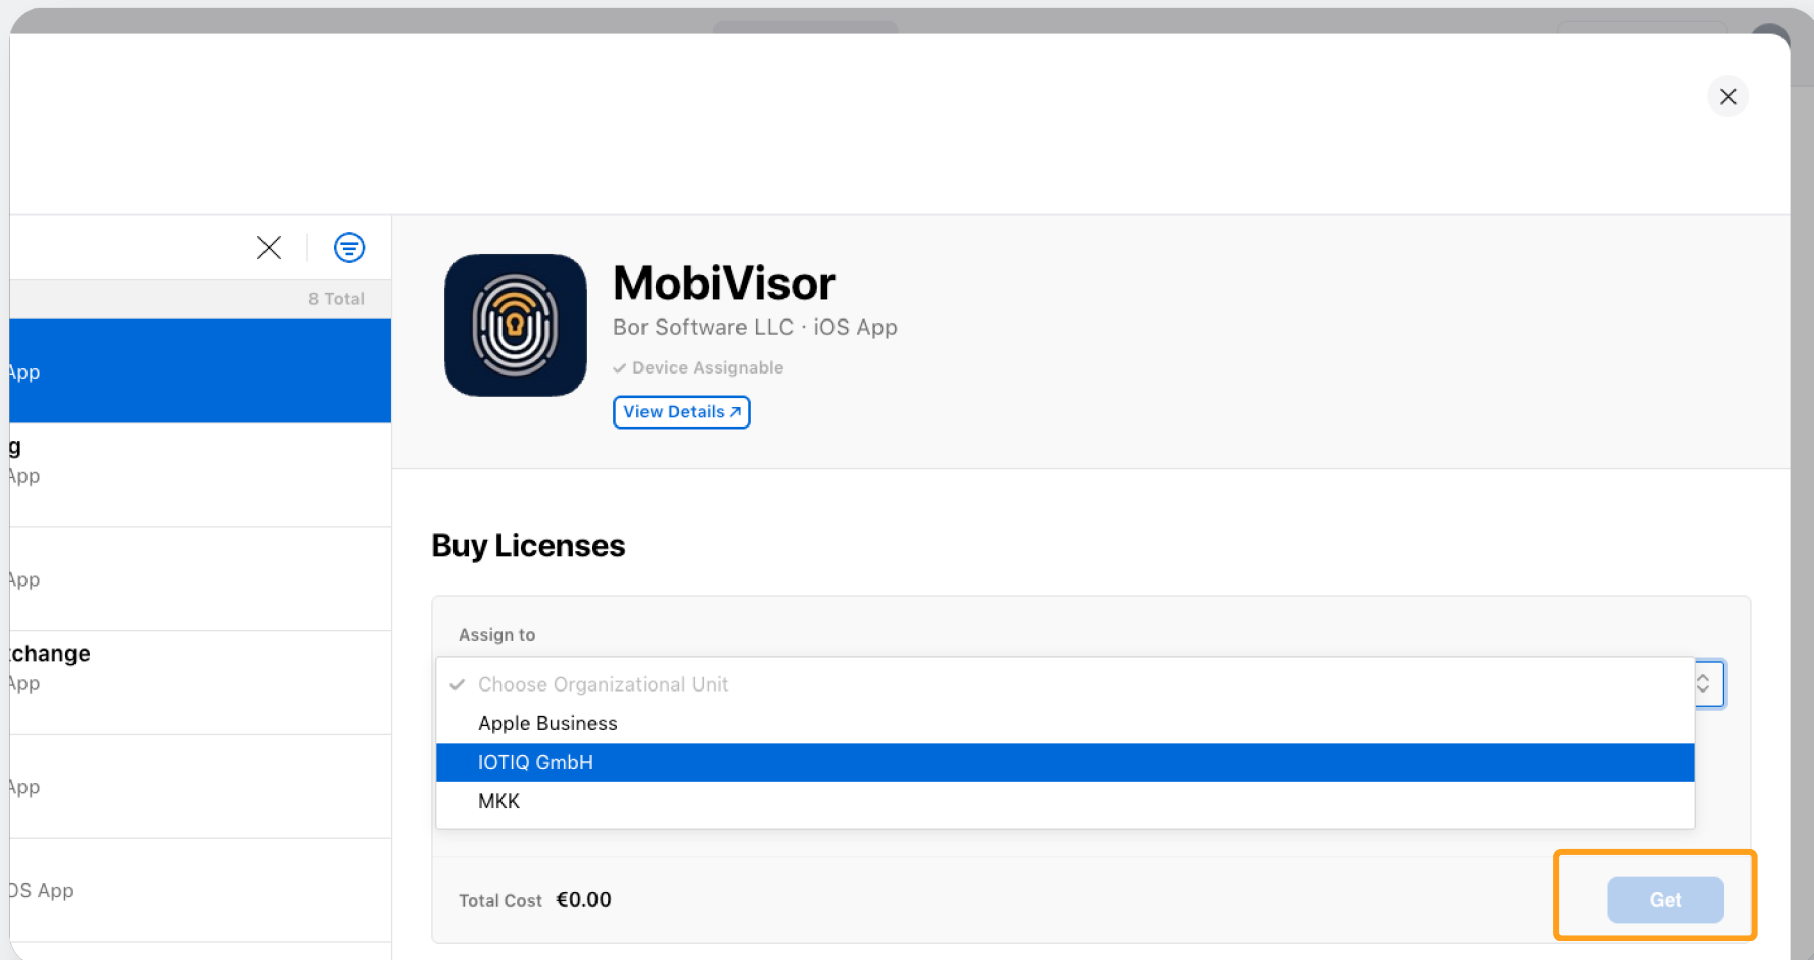

You can now search for the app you wish to add. **Select it from the left-hand column.**

MOBIVISOR

Step 5

Once you have selected the app, you can **assign it to your organisation**. Click **"Get"** to assign the app.

MOBIVISOR

Step 6

Fill in the liscense number you need to add.

€0.00	1000	None

Total Cost **€0.00**

Step 7

Log in to your MobiVisor environment and go to **Config > Apple VPP**. Switch to the **“Applications”** tab. Here, you now need to **synchronise the apps** so that they can be distributed via MDM.

Step 8

To **install the app on mobile devices**, you can now either assign it to a group or install it individually on each device.

The screenshot shows the Mobivisor web interface. At the top, there's a navigation bar with tabs: Commands, Devices, Config, Messages, Applications, Policies, and Users. The 'Applications' tab is selected. Below the navigation bar, there's a 'Groups' section with a search bar and a 'Synchronize Ld' button. A table lists groups, with one group highlighted: 'Local' group named 'IOS Datenschutzvorlage' with 1 total user (0 administrators). The 'Applications' column for this group shows 'Gmail - Email by Google', 'Mobivisor Messaging', and 'TikTok', each with a 'Latest Version' button and a download icon. Below the 'Groups' section, there's a 'Users' section with a sub-tab 'Applications' selected. This section has a search bar for 'App Name' and 'Environment', a 'Sync Devices' button, and a table of applications. The table has columns: Environment, Application Name, Management Options, Version Code, Version Name, Created At, Image, and Application Type. One application is listed: 'Spotify - Music and Podcasts' for the 'iOS' environment, with a 'Show All' link in the description and a 'Show' button in the version name column.

Group Type	Group Name	Users In Group	Applications	Policies	Actions
Local	IOS Datenschutzvorlage	1 Total 0 Administrator(s)	Gmail - Email by Google Mobivisor Messaging TikTok And 4 More	No Policies	Clone Edit

Environment	Application Name	Management Options	Version Code	Version Name	Created At	Image	Application Type
☒ iOS	Spotify - Music and Podcasts Spotify is the best way to listen to music and podcasts on mobile or tablet. Show All	Remove App On MDM Removal: Prevent Backup:		Latest Version Show	08/01/2022 14:23		iTunesStoreApp

1. Users > Groups
2. Choose Group
3. Click "Edit"
4. Tab "Applications" and choose the app
5. Click "Save"
6. Choose "Send a request"
